

# Login Form validations

Please create a signup page with two fields [email,password,phone].

When submitting form you have to validate email to make sure it's valid email type.

Phone number validation to check it's 10 digits.

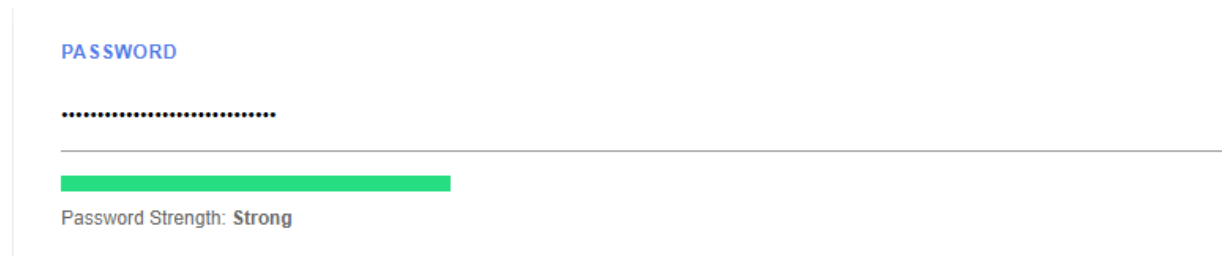

Password- Password must include(1 capital, 1 small, 1 number, a special character, 8 characters)

When typing we have to show password validity by strength bar as shown below,

If password contains only 1 or 2 of above matters – Weak password (color :red)

If password contains only 3 or 4 of above matters – medium password(color :yellow)

Else strong password(color :green)

A screenshot of a password input field. The label 'PASSWORD' is in blue. The input field contains 10 black dots. Below the field is a horizontal line. Underneath the line is a green progress bar that is approximately 75% full. Below the bar, the text 'Password Strength: Strong' is displayed in a small, grey font.

If everything is correct hide the sign up screen and show Thank you screen.

Thank you content – Thank you for sign up. We will get back to you soon!
